

TUFTED RUG

Care Instructions

PREVENTIVE MAINTENANCE

- Hand brush, sweep or vacuum regularly
- Remove spills immediately by blotting with dry cloth
- Avoid using harsh chemicals to remove stains
- Keep Dry and make sure fully dry before use
- Do not soak in water | Do not machine wash | Do not dry clean

CARE AND CLEANING

Vacuuming is one of the most effective and economical ways to keep your rug clean. Use a suction vacuum with the beater bar off. Brushes on a beater bar or rotary brush nozzles can twist or break tufted fibers, and turning it off helps to reduce wear and tear on your rug.

If your vacuum has an adjustable suction option, set to a low level, and take time to run the vacuum over each area 3-5 times to clear dust, dirt and hair.

STAINS

For dry stains, carefully scrape and vacuum away dirt and stains.

Remove wet stains by using a paper towel or undyed cloth to absorb the stain. Use lukewarm water and a cloth or sponge to dampen the stain, soak up the water with a cloth, and repeat until the stain fades.

Avoid drenching the rug to preserve the glue binding holding the tufts in place.

On greasy or stubborn stains, use a ph-neutral and bleach free cleaner and follow the steps above. Clean Professionally. Do not dry-clean.
